This guide contains instructions on how to set up a Thompson Reuter ResearcherID profile.

More information about the ResearcherID can be found at [http://www.researcherid.com](http://www.researcherid.com)

**Registration**

Go to Curtin Library's [Databases](#) page. Select the [Web of Science](#) database from the ‘Popular databases’ list.

On the [Web of Science](#) platform, select and click on **More**.

Select and click on **Author Search**.

On **Author Search**, enter your last name and initials as indicated.
Click **Select Research Domain** to select the research domains associated with your publications (optional).

Click **Select Organisation** to continue, then select ‘Curtin University’ and variations such as ‘Curtin Univ’ from the alphabetical list.

Click on **Finish Search**.

The results of your search will appear on a new page. Claim your articles from the list by clicking on the box next to the numbered items. Your selected articles will automatically be saved to the **Marked List** as you navigate to the next page.

After selecting your list of articles navigate to the top right and click on **Marked List**. The Marked List will display the number of publications you have selected.

Ensure steps 1 and 2 have been selected.

In Step 3 select the destination – click on the dropdown arrow and select *Save to ResearcherID – I wrote these*

You will be prompted to confirm that you authored the selected publications or have been authorised to administer the author’s ResearcherID profile. Click **OK**.

If you already have a ResearcherID, select and click on **YES** and sign in to your ResearcherID.

If you do not have an existing ResearcherID profile, click **NO** to register with ResearcherID:

- Enter your email address, and click **Continue**
• You will be redirected to the ResearcherID.com website to complete your registration.

Associate ORCID and ResearcherID

On the ResearcherID website, login by entering your ResearcherID or email address, followed by your password.

Associate your ORCID with your ResearcherID by selecting the relevant radio button.

Select ‘I already have an ORCID record’. Once complete, you will be able to synchronise the profile data between your ORCID and ResearcherID profiles, send your publications to ORCID or add ORCID publications to your ResearcherID profile.

If you do not have an ORCID, click on ‘I would like to create an ORCID record’, followed by Continue. You will be redirected to the ORCID website to register an ORCID.

Adding publications using EndNote

You can manually add publications to your ResearcherID profile from EndNote or EndNote Online. However, these publications will not be included in the citation metrics.

All users of ResearcherID automatically have an EndNote online account.

In your ResearcherID profile, click on the EndNote link at the top navigation bar, or enter the URL http://myendnoteweb.com/ in a new window.
In EndNote Online, navigate to the table on the left of the page and click on **My Publications** (under ResearcherID)

You can move any of *your authored* publications/references into the **My Publications** list to automatically populate this information in ResearcherID. Any publications in this list will be reflected in your ResearcherID Profile.

Ensure that only *your authored* publications are moved to the **My Publications** list in Endnote Online to avoid accidentally adding other authors’ publications to your ResearcherID profile.

Other useful or favourite publications should only be moved to **Publications List 1** or **Publications List 2**.
